

# SANDESH HEGDE

*Student*

## PROFILE

I am a Computer Applications student. I consider myself a responsible and orderly person. I am looking forward for my first work experience.

## CONTACT ME

(+91) 8762712396

sandesh.hegde55@gmail.com

Mandemane, Vanalli,  
Sirsi(U.K), Karnataka  
581336

## EDUCATION

**MCA:**

**NITTE MEENAKSHI INSTITUTE OF  
TECHNOLOGY, BENGALURU**

2020-2022

**BCA:**

**JSS SMI UG & PG STUDIES DHARWAD**

2017-2020

## LANGUAGE

Native English.

Fluent Kannada and Hindi.

## COMPUTER SKILLS

Basic HTML AND CSS,

C/C++,

Python,

JavaScript,

MERN Stack (Mongo DB, Express,

ReactJs, NodeJS)

SQL Server

## VOLUNTEER EXPERIENCE

**NSPLUS TECHNOLOGIES**

Internship:

.NET Developer as an intern for 5 Months.

## PROJECTS

### 1. TECH BLOG USING MERN STACK

1. **Design and Layout:** Design the layout of blog component to be visually appealing and easy to read.
2. **Retrieve Data from Backend:** created API endpoints in Node.js backend to fetch the data. also using Express.js to create those endpoints.
3. **Display Data:** Retrieved the data from the backend, display it in component using React.js, also used JSX to dynamically render the different sections of the blog.
4. **User Authentication:** Implement user authentication using JWT, Allow users to sign up, log in, log out, and update their profile information.
5. **Testing:** Thoroughly tested components to ensure that all the data is displayed correctly and that there are no bugs or errors.
6. **Deployment:** Deployment done with render.com

### 2. RESTAURANT APP USING MERN STACK

1. **Database Design:** Created structure of MongoDB database. Designed schema for menus and all other data.
2. **Backend Development (Node.js and Express.js):** Used Express.js to create RESTful APIs for interacting with MongoDB database. Implement CRUD (Create, Read, Update, Delete) operations for managing restaurants, menus, orders, etc.
3. **Frontend Development (React.js):** Design the layout of restaurant application using components. Fetch data from your backend APIs using Fetch API and display it in components.
4. **User Authentication:** Implement user authentication using JWT, Implement password hashing and other security measures to protect user data.
